March 5 2024 Democratic Party Presidential Primary March 5 2024 Republican Party Presidential Primary Line Length Data Collection

Thank you for agreeing to assist the **Bipartisan Policy Center** in collecting data to study the length of lines at polling places. The data collected on this form will be analyzed by a team of researchers who are working to improve the voting experience. The data is not intended to judge how well any precinct performs. Rather, data throughout the country will be combined to provide a comprehensive picture about Election Day at the polls. If you forget, or find it impossible to count the line length within five minutes of the designated time, put an "X" in the corresponding box and resume counting at the next time period.

- Do not count non-voters, e.g., children who are waiting with their parents. It is important not to leave any boxes empty.
- If there is no one in line at the indicated time, enter a zero "0".

Part C: Discrepancies

Please provide an explanation *if* the total number of voters checked in does not equal the total number of votes cast.

For example:

1. At 9am a voter left the precinct w/o casting a ballot. The ballot was voided. Because of this, our pollbook total is one more than our scanned total.
2. Our total number of ballots scanned does not equal the number checked in on the pollbook. We do not know why this happened, but we accept the machine total.

8:37am Voter left without putting ballot into scanner. Recorded as void on BRR
